

Compare 28uF 250VDC JSX series with 28uF 250VDC JPX series Mounted on a Crossover Board

Test Reviews

Using JSX and JPX series by JB Capacitors

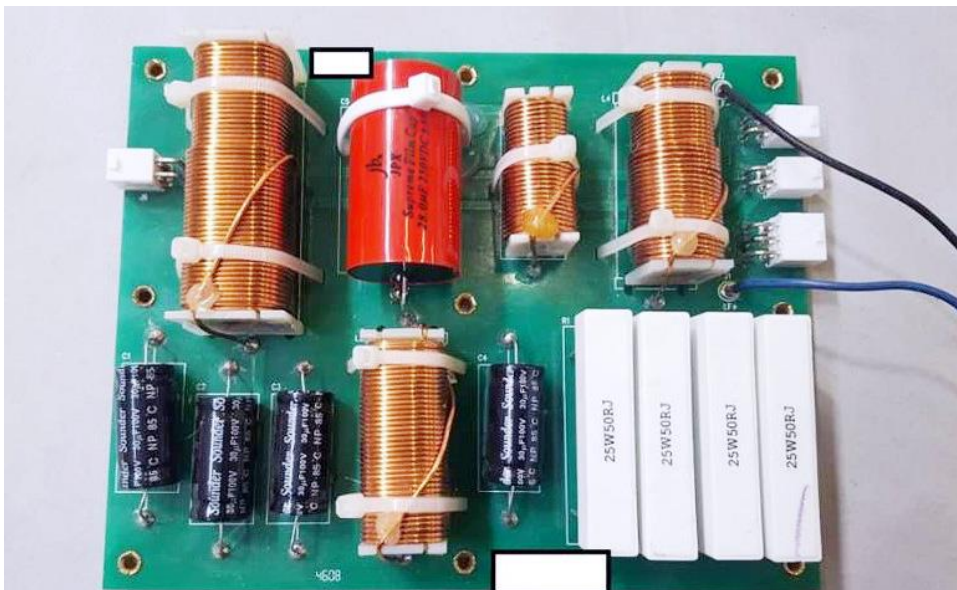

28uF 250VDC JSX series

Superior Metallized Polypropylene Film Capacitors Axial Mounted on a crossover board for a 12' coaxial Stage monitor: Really good and clear sound with this part. Fits perfectly for the application.

28uF 250VDC JPX series

Supreme Metallized Polypropylene Film Capacitors Axial Mounted on a crossover board for a 15' coaxial Stage monitor: Seems to sound even more accurate and detailed than the JSX version.
